SUPER-INTENSIVE OLIVE HARVESTER
HIGH PERFORMANCE

Olive harvester specially designed for **super-intensive plantations**.

Large dimension tunnel to collect super-intensive olive trees of different sizes.

HIGH PRODUCTIVITY

- It **improves the amortization of the tractors**, to be able to use it during the rest of the year for other tasks.
- **Better use of the plantation surface** of the farm, as no partitioning streets are needed to discharge hoppers.
- **Greater fruit collection area** to minimize the fall to the soil of the same.

INNOVATION

- **Precise guidance** thanks to the combination of the front correction by the draw bar of the tractor and the rear by the steerable wheels.
- Destemmer before lifting, which eliminates the annoying jams caused by climbing sticks or branches by ribbons to the discharge.
- **Double suction system** combined with destemmer that achieves an excellent cleaning of the fruit.

PROFITABILITY

- **Low maintenance cost.**
- It has **unloading belt** and **two auxiliary hoppers** (option) to facilitate the operation before different circumstances that may occur in the collection.
- **Control panel** installed in the tractor cabin with on-board computer.
- Equipped with **cameras** to aid in driving and control of the harvest process.
- GPS system with assistance system and remote software update (optional).

SPECIFICATIONS

Shakers	25 pairs
Height shaking from the ground	3,6 m.
Required tractor power	115 CV
To go around	6,5 m. without maneuvers
Optional Hoppers	2
