- Forage harvester

Possibility of use in a **multitude of crops**: grass, alfalfa, lentils, oats, clovers, chickpeas, cereals, canola, buckwheat, buckwheat, forage seeds... etc.

TECHNICAL SPECIFICATIONS	
Working width	4,5 m. 6,5 m. 7 m. 7,5 m.
Weight	1.200 - 2.300 kg.
Belt width	1 m.
Reel diameter	1.550 mm.
Reel speed	Adjustable
Cutter box	Hydraulics
Transmission	PTO

Items included ●	Optional Items ○
Belt reversal system	●
Side wings	●
Sliding belts	○
Third Belt	○
Vertical knives for rapeseed	○
Auger	○

TECHNOLOGY IN YOUR HANDS

Hydraulic drive of all elements, including the cutter system.

High performance reel with adjustable position from the cab.

Optional **vertical blades** for rapeseed harvesting, lateral and central.

Discharge **speed control**.

Copying and floating system on the ground.

Swathing to one side, to both sides or to the center, being able to move and invert the direction of rotation of the belts.

Equipped with wheels at the ends.

Outlets for large-sized material, suitable for tall rapeseed.

ADVANTAGES OF THE SW SWATHER:

- Crop drying up to 2 times faster.
- Facilitate the work of the combine harvester
- More homogeneous ripening of the crop.
- Less grain losses.
